

Assessment at The Shrubbery School

Over the last two year in line with National Curriculum guidelines we have moved from measuring attainment by level and moved to age expected bands. Last year's Key Stage 2 SATs results were the first to be measured in this way.

Within the school we record progress using our software to inform teaching and learning.

An assessment calendar is in place that can measure attainment at given points so that intervention can take place to bring about the best outcomes for the child.
